

Crio OnePress

crio®

The ultimate choice for consistency, effectiveness, and versatility

Introducing the Crio® OnePress, 16" x 20" swing-away press designed to elevate your heat transfer experience, especially when paired with the Crio 8423WDT printer. This dynamic duo ensures optimal performance for mirroring white toner transfers and applying designs to various surfaces like t-shirts, hats, wooden substrates, mylar balloons, and more. Engineered with heavy-duty steel and an industrial-grade design, the Crio® OnePress assures both durability and consistent high-quality results.

SKU: ONEPRESS 20

\$2,395^{MSRP}

Consistent and Optimal Results

Uniform heat and pressure distribution across the entire pressing surface, ensuring optimal heat transfer results.

Reduce Fatigue and Boost Productivity

Apply over 1200 lbs of downward force effortlessly, reducing fatigue and boosting productivity. Additionally, the 180° swing-away design simplifies the process of loading and unloading items, eliminating the risk of burning yourself and improving overall efficiency.

Seamless compatibility with Crio white toner printers

What sets the Crio® OnePress apart is its seamless compatibility with Crio® printers (8432WDT and 9541WDT), enabling full-color transfers onto diverse materials producing long-lasting results.

Convenient and User-Friendly

The Crio® OnePress is distinguished by its user-friendly design. Equipped with an LCD touchscreen for effortless time and temperature input and user presets for convenient customization. Prioritizing safety, it includes an auto-shutoff function to prevent accidents.

Expert Support with CrioCare

From instructional how-to videos to free training, Crio® offers unparalleled support to ensure your success. For peace-of-mind, every Crio® OnePress also comes with a one-year warranty and a lifetime warranty on the heating element.

Specifications

Performance

- 16"x20" (40.64x50.8cm) **American Made** Swing-away heat press
- 180-degree swing-away motion.
- Apply over 1200 lbs of downward force effortlessly
- Optional splitter stand for faster garment threading
- Pressure adjustments for items up to 1-3/4" thick
- Uniform heat and pressure distribution ensuring reliable results

Compatibility

- Seamless compatibility with Crio white toner printers (8432WDT and 9541WDT)
- Smooth workflow for various heat transfer decoration techniques, including white toner, DTF, HTV, sublimation, and others

User Interface

- User presets available
- Integrated digital touchscreen controls for time and temperature (200°F - 450°F)
- Digital press counter with the option to reset at any time

Environmental

- **Pressing Surface:** 16"x20" (40.64x50.8cm)
- **Weight:** 121 lbs.(55 Kg.)
- **Machine Dimensions:** 18.5"x21"x30.5" (47x53x77.5cm)
- **Power Consumption:** 14.5 Amps (1750 Watts)
- **Voltage:** 120V

Warranty

- **Heating Element:** lifetime warranty
- **All Other Elements:** one-year warranty
